

Covid Safety Accommodations for Colab Classes

General:

- All participants must wear a mask over nose and mouth at all times.
- All instruction and activity takes place outdoors only (for now) under the distancing configurations given below
- Rolling garage door and front door open for ventilation while students are present
- Only one person allowed indoors (for restroom use) at a time
- Restroom handles and all surfaces to be used for class are sanitized before the start of class and after class ends
- Only enrolled students (max 5) and instructors who've signed Colab's waiver may attend in person
- Participants must abide by all Colab's rules
- At most 2 additional people may be present: a videographer, and a Colab manager to open, close, and supervise

During Demonstration:

Up to 5 students will be present, standing on chalk marks on the driveway in this configuration:

During Student Work:

- Each student's work area will be at the center of an 8' diameter circle drawn in chalk on the driveway
- Students will be asked to not enter other students' workspaces
- Circles are spaced 4' apart, so that students standing at their easels are 12' from one another
- After asking for consent, the instructor may come within 3 feet of the student to give momentary advice on the work
